

## GLOBAL LABEL AND PACKAGING COMMUNICATION

### Beckman Coulter immunoassay products

September 2017

Dear Beckman Coulter Immunoassay Customer,

We are improving our product labeling and packaging. Over the next few months, you may notice changes to our product labeling as a result of this initiative. We are also updating our document and label formatting. There are no changes to our immunoassay products.

Some of the improvements include:

- > Symbols that replace product labeling text, harmonizing our global packaging
- > A comprehensive glossary of the symbols used in our immunoassay packaging
- > Removal of the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) warning information from our kit packaging
- > A return to the specific disease state color identifiers on our packaging for easier inventory maintenance
- > Increased font size on our immunoassay reagent, calibrator and control packaging

We encourage you to visit our website dedicated to product labeling and packaging information: [www.beckmancoulter.com/productlabeling](http://www.beckmancoulter.com/productlabeling).

There you will find examples of the label changes and a glossary of symbols. While visiting the site, you can login or register for "My Technical Documents" to receive future notification of document updates.

Please note that you may see a mixture of labeling styles on products throughout the transition period. These updates are targeted to begin in October 2017.

If you have questions regarding this transition, please contact our customer service team:

- > From our website: [www.beckmancoulter.com](http://www.beckmancoulter.com)
- > By phone: 1-800-854-3633 in the United States and Canada
- > Outside the United States and Canada: contact your local Beckman Coulter representative

Thank you for your continued support of Beckman Coulter products and services.
